

# MAKE GROWTH INCLUSIVE, CREATIVELY!

Kindly hosted by UKCCA  
2 • MAY • 2019

At this event, we'll be pressing home the need to think about local inclusiveness from the get-go for all economic growth strategies. Given that the creative industries, arts and culture is one of the fastest growing sectors, it has a huge role to play in making this happen.

But, in our sector, there are barriers to local employment and development that we need to overcome. In the workshops, we'll be unpacking what these barriers are and how we tackle them.

# EVENT PROGRAMME

2 • MAY • 2019
