Our Mission

'Inspiring the next generation of coders'

What we do

go**code**.
academy

Duration 12 Weeks
1 hour sessions for 12 weeks
£50 per month (£12.50 per session)

5 days
6 hours per day for 5 days during the holidays
£150 for 5 days per students

What do young people get?

Our after school clubs and holiday camps are packed with fun activities, challenges and workshops where young people can build websites, mobile applications and games.

- Learn highly in-demand programming languages:
  Python (12-18 year olds)
  Scratch (8-12 year olds)
  HTML and CSS

- Learn essential tech skills for a bright future
- Develop logical and computational skills
- Increase critical thinking and problem solving abilities
- Take home new skills, custom-made games, apps and websites
- Have fun building new technologies in a collaborative space
- Gain a good understanding of how websites are built
- Create with new innovative tools and approaches

How we teach

We believe that young people should build, break and fix. We encourage our students to be as creative as possible. We give our students the practical skills for the tech world. Our goal is to increase their computational and logical thinking.

In addition to the technical skills, we focus on developing key soft skills including:
- Team work
- Confidence
- Presentation
- Brand building

What do students say?

"It's great being in an environment with other students of similar age and interest such as programming. If we get stuck, we can help each other and learn from each other. I would definitely recommend it because it's super fun and I'm always learning."

Dawson Taylor, 12 years old, Student, Ousedale School

What do students say?

Srinivas Subramanyam
Student - Denbigh School

What do parents say?

"Dylan does computing at school, but they can only take it so far. To come to a place like GoCode Academy where it's welcoming, generous and provides a environment for him to develop is brilliant."– Lisa Masters, Parent

"Dawson attended GoCode Academy's Easter Coding Camp and he loved it. It gave him an opportunity to interact with other young people and learn things he hasn't been able to learn at school"– Leanne Taylor, Parent

GoCode Academy

Awards

Nominated for Acceler8 2016
Winners of #GoDo Award 2017

FSB Worldpay Business Awards 2017
Young Entrepreneur of the Year
